DetailsApplyJob DescriptionResearch Coordinator - Rheumatology/Immunology & Allergy Practice
(Travel may be required)

 As Practice Research Coordinator you will coordinate the daily activities of the designated study or group of studies. You will coordinate and monitor research trials; actively overseethe recruitment of study participants. You may be required to perform venipuncture on study participants; collect, process and ship specimens according to protocol and Haz-Mat training requirements. You will also adhere to Good Clinical Practice, and comply with regulatory and grant agency requirements, and study protocol. You will maintain study records and collaborate with the Institutional Review Board as necessary.

 Responsibilities Include

Responsible for coordination of a designated study or group of studies. In research projects, oversees recruitment of subjects, implementation of study procedures, and the collection and processing of data. Keeps accurate and up-to-date records.
May be required to perform phlebotomy, electrocardiograms, or monitor vital signs on study participants. Reports findings to supervisor.
Collects, labels, logs, processes, and ships biological specimens for analysis according to protocol and Haz-Mat training requirements.
Schedules subjects for protocol-related evaluations. Collaborates with physicians, investigators and other healthcare providers. Promotes respect for subjects' rights.
